## **Constructie Berekening Mastfundatie Kantelmast 6,0 m Utop < 10 mm**

*Opdrachtnr: 12466 - 1*

Document: Ber-03 *Definitief*

Datum: 30 januari 2012

**Project:**

Deelconstructie Berekening fundatie  
Fundatie mast

...

**Opdrachtgever:**

## 1. UITGANGSPUNTEN

### 1.1 NORMEN

Berekeningen worden uitgevoerd conform de TGB 1990:

NEN 6702 TGB Algemeen - belastingen en vervormingen  
NEN 6720 Voorschriften beton "constructieve eisen en rekenmethoden" (VBC 1995)

### 1.2 MATERIALEN

|            |                      |       |                       |
|------------|----------------------|-------|-----------------------|
| Beton      | C20/25               | $f_b$ | 15 N/mm <sup>2</sup>  |
| Betonstaal | B 500 B (FeB500 HWL) | $f_s$ | 435 N/mm <sup>2</sup> |

### 1.3 BELASTINGFACTOREN

Bouwwerkaanduiding: overige bouwwerken  
Bijbehorende veiligheidsklasse: 1

| Belastingfactoren uiterste grenstoestand | <i>normaal (e.g. ongunstig)</i> |      | <i>e.g. gunstig</i> |      |             |      |
|------------------------------------------|---------------------------------|------|---------------------|------|-------------|------|
| Fundamentele combinatie 1                | $g_{f,g} =$                     | 1,20 | $g_{f,q} =$         | 1,20 | $g_{f,g} =$ | 0,90 |
| Fundamentele combinatie 2                | $g_{f,g} =$                     | 1,35 |                     |      |             |      |
| Belastingfactoren bruikbaarheidstoestand | $g_{f,g} =$                     | 1,00 | $g_{f,q} =$         | 1,00 | $g_{f,g} =$ | 0,90 |

### 1.4 STABILITEIT

De stabiliteit wordt verzorgd door een inklemming van de mast in de fundatie.

### 1.5 FUNDATIE

De mast wordt gefundeerd op staal, omdat dit een algemene fundatieberekening betreft en niet een berekening specifiek voor een bepaalde lokatie wordt gerekend met een geringe beddingsconstante en toelaatbare gronddruk. Voor de beddingsconstante wordt gerekend met een waarde van 5000 kN/m<sup>3</sup> en voor de toelaatbare gronddruk wordt 20 kN/m<sup>2</sup> aangehouden. Bij het realiseren van een mast met de in dit rapport berekende fundatie moet wel worden gecontroleerd of dat de in dit rapport gehanteerde waarden corresponderen met de ondergrond van de mastlokatie.

**Project:** Mastfundatie kantelmast 6,0 m  
**Plaats:** -  
**Werknummer:** 12466-1

HOOFDSTUK 3.

## **BEREKENING FUNDATIE**

Project...: Mastfundatie kantelmast 6,0 m  
 Onderdeel: 003: poer met sokkel  
 Dimensies: kN;m;rad (tenzij anders aangegeven)  
 Datum....: 17/01/2012  
 Bestand...: X:\Ing.Buro\12400 tm 12499\12466\BouwConstructie\Berekening\  
 12466-1 003.rww

Belastingbreedte.: 1.000

Rekenmodel.....: 2e-orde niet lineair elastisch.

Theorieën voor de bepaling van de krachtsverdeling:

1) Losse belastinggevallen:

Lineaire-elasticiteitstheorie

2) Uiterste grenstoestand:

Geometrisch lineair voor de staafnr('s): 2,3.

Geometrisch niet lineair voor de staafnr('s): 1.

Fysisch niet lineair alle staven.

3) Gebruiksgrenstoestand:

Lineaire-elasticiteitstheorie

Waarschuwing: Bij elastisch ondersteunde staven worden geometrisch niet lineaire  
 effecten (2e orde) verwaarloosd!

Convergentie coefficient.....: 2.0 Maximum aantal iteraties.....: 50

Max.deellengte kolommen/wanden: 0.500 Max.deellengte balken/vloeren: 0.500

Max. X-verplaatsing in UGT.....: 0.500 Max. Z-verplaatsing in UGT....: 0.250

Gunstige werking van de permanente belasting wordt automatisch verwerkt

## TEKENING FUNDATIE

### Doorsnede A

Mast en ankers volgens opgave  
leverancier mast  
ondersabelen met krimprijke mortel

**Wapening** Kwaliteit:  $\phi 4$  en  $\phi 5$ : B500A (HKN) / overig: B500B (HWL)

**Beton** Kwaliteit / milieuklasse en dekking (NEN-EN 206-1 en NEN 8005 / NEN 6720).

Aangegeven dekking op wapening is inclusief: oncontroleerbaarheid; nabewerkt oppervlak en brandwerendheid.  
Befonddekking op hoofdwapening tenminste:  $\phi k$  voor  $\phi k < 25$  mm;  $1,5\phi k$  voor  $\phi k > 25$  mm.
